Robust

High Efficiency Traction Chargers Century ROBUST 36V 53A CG5520

Robust is a newly developed range of very compact, high frequency chargers for harsh environments, such as cold storage, where there is a high level of moisture and dust.

The integrated industrial microprocessor using Century's specified algorithms can optimise charging on a range of battery types, including VRLA (Sealed) batteries. This optimisation has the benefit of delivering a fully charged battery quicker while minimising the effects that standard chargers can have on batteries.

The use of high frequency power conversion can reduce the amount of input energy consumed for charging, with a high level of control of the power applied to the battery.

Using advanced technology means that the chargers are lighter weight to conventional thyristor controlled chargers; giving operators the choice of wall mounting these chargers to prevent the risk of damage from impact from other equipment as well as increasing floor space utilisation.

Features and Benefits

- Compliant to relevant Australian Standards: Century ensures full compliance with all relevant standards applicable to traction chargers.
- Protection class IP54 protected for high dust and moisture environments. It can reduce the amount of internal short circuits as a result of condensation or high humidity environments.
- Up to 95% less energy losses and more energy efficient.
- Extremely light and compact with a modern design.

Robust Century ROBUST 36V 53A CG5520

ELECTRICAL INPUT SPECIFICATIONS		
VAC Input	1P 230Vac ±10%	
Input Current (Max I)	11.6A (@230VAC)	
Input Frequency	47-63Hz	
Power Socket Required	56C315	
Power Factor	>0.98 at rated power	
Efficiency	MAX 93% at full load	

ELECTRICAL OUTPUT SPECIFICATIONS		
High Frequency Conversion(Soft Start)		
36VDC		
1.4 to 2.9VDC per cell		
2.3kW(2.4VPC @ 230VAC)		
53A		
<1%rms from maximum output voltage		
(1MHz bandwidth)		
VDC output $\pm 0.5\%$ / Current output $\pm 2\%$		

STANDARDS	
Emissions	EN61000-6-3
Immunity	EN61000-6-2
Safety	EN60335-1 & EN60335-2-29

MECHANICAL		
Weight (kgs)	6.1	
Height (H) (mm)	367	
Width (B) (mm)	230	
Depth (D) (mm)	80	

ENVIRONMENTAL SPECIFICATIONS

Environmental Protection	Conformal coating
Operational Temperature (Ambient)	0°C to + 40°C (Full Power), ~55°C (Absolute Max)
Storage Temperature	-35°C to + 55°C
Humidity	RH <95% Non-condensing
Cooling	Fan cooled
IP Rating	IP54

An affiliated business of the GS Yuasa Corporation, Century Yuasa has over 80-years of supplying a range of stored energy solutions to the Australian market. An established network of sales and distribution offices throughout Australia and New Zealand has seen the business gain the trust and respect from its customers by focusing on quality products and exceptional customer service. The portfolio within Century Yuasa includes a wide range of stored energy products and services, as well as identifiable brands and unique technologies for automotive, materials handling and stationary power applications. Directly maintaining and operating two manufacturing centres in Australia and employing some 500 people, Century Yuasa continues the leading Australian manufacturer of stored energy products.
